

AL Shola Cooling Solutions

www.alshola.com

AL SHOLA GROUP

Al Shola Transport Company was founded in 1976 as a construction equipment division and expanded into the UAE's Rental Solutions Division in 2007.

Al Shola has partnered with Daikin, the world leader in air conditioning, to offer premium cooling rental solutions. This brings our customers a reliable and energy-efficient wide range of air conditioning options. This collaboration allows Al Shola to provide Daikin's advanced cooling systems for short-term and long-term rental needs, ensuring exceptional comfort and performance. Customers can now access top-tier cooling equipment with flexible leasing terms, backed by the expertise of Daikin and Al Shola, whether for commercial, industrial, process cooling, wild air or event areas. This partnership guarantees reliable service and cutting-edge air conditioning solutions for diverse applications.

We have a variety of brand-new cooling equipment for temperature control. Our specialized high-ambient air-cooled screw chillers are designed to operate in temperatures up to 55°C, making them ideal for the challenging GCC climate. These units boast impressive energy efficiency, with SEER ratings up to 6 and EER ratings up to 3.3.

We are dedicated to environmentally friendly practices, offering energy-efficient HVAC solutions and continuously working to reduce our carbon footprint.

Our Mission

Our goal is to establish a welcoming, inclusive, and varied work environment for our staff members because we think that doing so will enable us to produce high-quality goods that satisfy customers.

Overall, AL SHOLA aims to accomplish the following values with regard to :

Our Clients :

- To provide outstanding value to our clients as our success ultimately depends on their satisfaction.
- To understand and exceed the expectations of our clients.

Our Partners :

- To build a network of knowledge in which everyone gives and takes.
- To work together and build a spirit of partnership with external providers who conform to AL SHOLA quality standards.

Our Employees :

- To increase the performance and skills through training and development.
- To increase an environment of trust, personal integrity, mutual respect and open communication.

HVAC Division

Al Shola will provide HVAC solutions with the latest and highest-performance equipment in partnership with the Global leader DAIKIN in Developing & manufacturing all Air Conditioning, Heating, and Ventilation solutions for Residential, Commercial & Industrial applications. We use a combination of fixed and variable frequency drive/Inverter type equipment to maximize the efficiency of our HVAC solutions. By selecting our brand-new fleet of Chillers, and HVAC systems, including Air Handling Units, Pumps, Package units, Free Standing units, and their accessories our customers have greater control over their power consumption enabling them to cut operational expenses. Our equipment has the best available KW per Ton of Refrigeration and is 10 - 15% more efficient in high ambient high load conditions than our competitors offer.

Optimized Performance and Energy Management

Our Daikin chillers use advanced heat pump and inverter technologies, and optional heat recovery to optimize the unit's performance, manage energy consumption, and reduce running costs and carbon emissions.

The heat pump technology uses renewable energy sources to save energy and cut costs. The inverter technology enables the unit to work at partial capacity, which reduces your energy consumption, running costs, and CO2 emissions by up to 25%.

Why AL Shola?

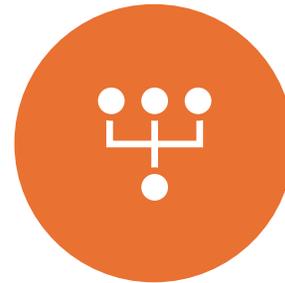

Quality Equipment: We provide top-of-the-line HVAC systems that are brand new.

Expertise: Our team consists of experienced engineers who can assess your needs and recommend the best solutions

Customer-focused: We prioritize our clients' comfort and satisfaction, providing 24/7 support and quick response times.

Flexible Terms: We offer flexible rental terms, accommodating short-term and long-term needs.

HVAC Rental Fleet Product Range

Portable Air Conditioners

- The indoor units are attractively styled to blend with most room decors. Advanced system components incorporate innovative technology to provide reliable cooling performance at high efficiencies and low noise levels.
- Available in various capacities from 3TR to 8TR.
- Equipped with flexible refrigerant hoses allows quick Installations.
- Suitable for temporary cooling in offices, server rooms, wild air, and events.

Packaged Air Conditioners

- Available in various capacities from 10 TR to 25 TR.
- Designed and manufactured to meet the requirements of the GCC's extreme climatic conditions and are built specifically for outdoor installations, either on the ground or roof level.
- Packaged Air Conditioners are ideal for commercial spaces, warehouses, tents, wild air requirements, and events.
- Equipped with flexible ducting allows quick installations.

Air-Cooled Chillers

- Air-cooled screw chiller specifically developed to operate in High Ambient Temperature - up to 55°C
- SEER: up to 6 and EER: up to 3.3
- Each circuit equipped with Daikin inverter single screw compressor with an integrated variable ratio (VVR).
- Single units with cooling capacities ranging from 100 to 400 TR can be connected in series or parallel to achieve any desired capacity.
- Ideal for large commercial buildings, construction sites, DC Plants, and special events.

Air-Handling Units

- Air Handling Units are designed to meet the ventilation and air conditioning demand of the space while consuming less energy and generating less noise.
- Air Handling Units are suitable for indoor and outdoor installations, catering to a wide range of applications such as Commercial & Residential Buildings, Wild Air applications, Factories, and Events.
- Available in 100 TR & 200TR.

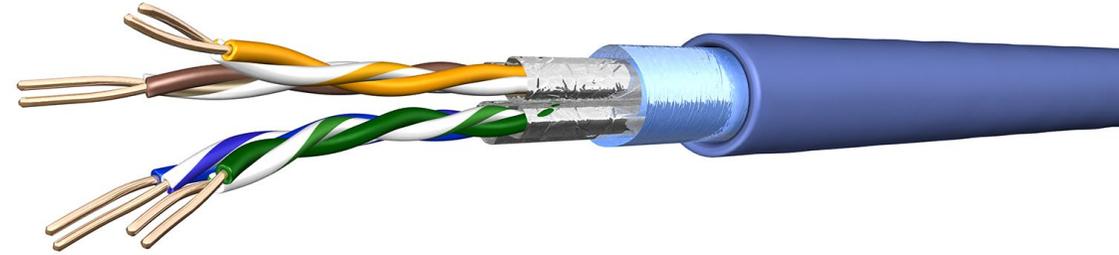

Container Refrigerant Units

- Best in class refrigeration storage solutions
- Single Power Unit
- Generator Compatible
- Optimum refrigeration circuit - R448A
- Twin scroll Compressors
- Versatile temperature control (-30Â°C to +8Â°C)
- Accommodate 18 Pallets

Accessories

CW Pumps in various capacity

- Flexible ducting for connecting units to spaces
- Adapters, fittings, and CW hoses as needed for various setups
- Various sizes of DBs and Cables

Monitoring & Control Systems

- Remote monitoring systems for tracking performance
- Smart controls that enhance energy efficiency and user convenience

Additional Services Offered

- **Consultation and Site Assessment:** Evaluate customer needs and recommend suitable equipment.
- **Installation and Setup:** Expert installation to ensure systems are working optimally.
- **Maintenance and Support:** Regular maintenance and quick response for emergency repairs.
- **Mob and demob Services:** Convenient logistics to ensure timely delivery and removal.

This broad product range allows for flexibility and the ability to cater to various markets, ensuring that your HVAC rental company can meet diverse customer needs effectively.

Industry Partnerships

We collaborate with industry giants to synergize our strengths and drive technological advancements together.

Market Achievements

Industry Recognition

We have received prestigious awards and accolades from renowned organizations for our innovative products and contributions to the industry.

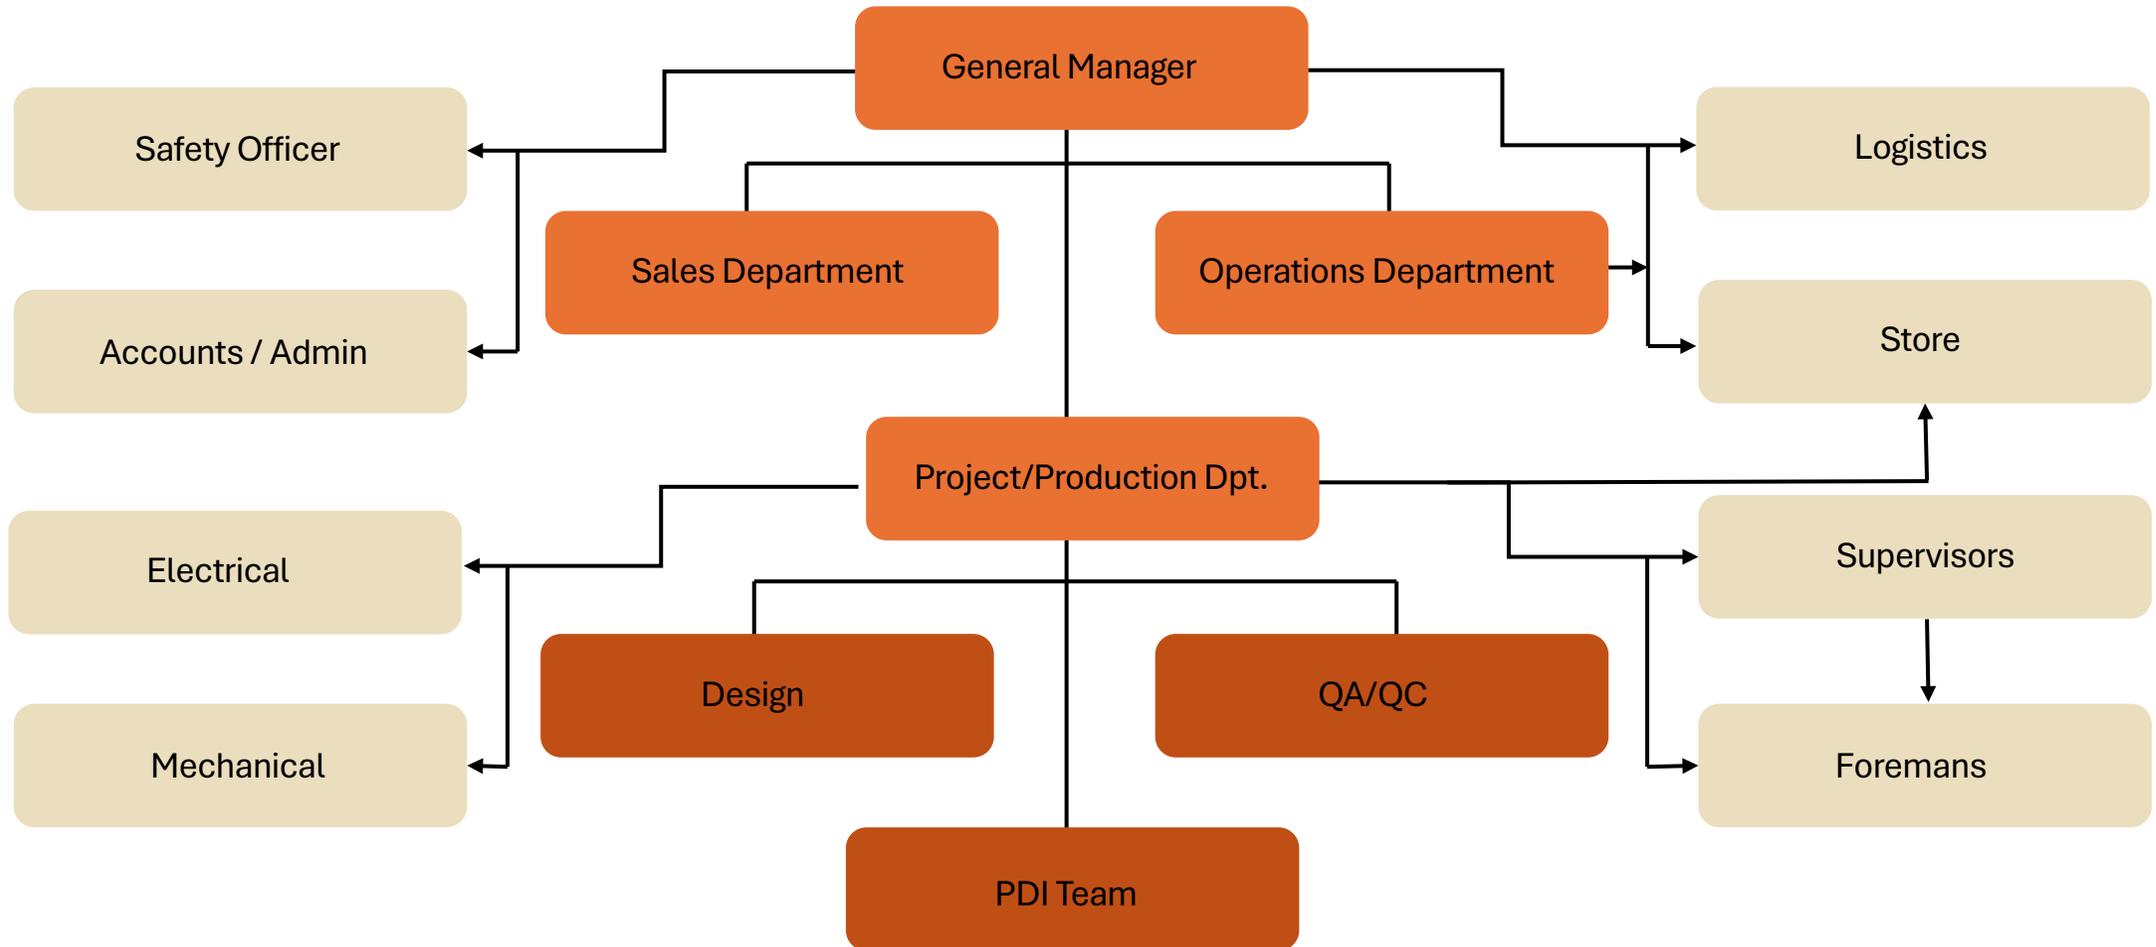

Our solutions have gained widespread acceptance, enabling us to secure a significant market share and establish a strong presence in key regions.

Rapid Market Penetration

Trusted Partner to Prominent Clients

We are the preferred technology partner for leading businesses, serving a diverse clientele and delivering exceptional value through our products and services.
